

DECLARATION OF INVESTIGATOR AWARENESS AND COMPLIANCE

The investigators declare that they have read, understood, and will comply with the ethical principles and safety recommendations governing research involving human participants.

Specifically, the investigators acknowledge familiarity with:

- the ethical principles set forth in the **Declaration of Helsinki** of the World Medical Association and its subsequent amendments;
- the approval requirements and procedures established by the competent Institutional Ethics Committee;
- the necessity of obtaining written informed consent from all participants prior to their enrolment in the study;
- the applicable international regulations and good clinical research practices for studies involving human participants;
- the **International Federation of Clinical Neurophysiology (IFCN) Expert Guidelines** for the safe, ethical, and responsible use of transcranial magnetic stimulation (TMS), as described by **Rossi et al. (2021)**.

By signing this declaration, each investigator confirms their commitment to conducting all experimental procedures in accordance with the approved study protocol, the applicable institutional regulations, and the relevant national and international ethical and safety guidelines.
